LARGE WHEAT SUPPLY MAKES MARKET DULL

Figures Are Almost Double What They Were a Year Ago and Most of Buying is Done to Cover Short Sales.

CHICAGO, Sept. 56 .- World's available supply figures showing an increase nearly double that of a year ago acted as a weight Tuesday on the price of wheat. Although the market was steady at the close, late quotations were 3-8c to 7-8c under Monday night. Corn lost 1-8@1-4c to 1c net and oats 1-4c to 1-4@ 3-8c. In provisions the outcome was a

decline varying from a shade to 40c. Most of the buying of wheat Tuesday seemed to be merely for the purpose of covering short sales. Bull speculators were discouraged by continued large receipts northwest and became still more depressed when announcement was made that the world's available stock now exceeded last year's total by more than 25,000,-000 bushels. In the corn crowd, general selling

of Sept. proved the main feature, Oats had a heavy undertone.

Liquidating sales by helders eased the provision market.
